EXECUTIVE SUMMARY

Highly skilled Full Stack Developer with over 3 years of comprehensive experience in both web and mobile application development. Proficient in creating scalable, secure, and user-centric platforms by leveraging cutting-edge technologies, including Python, Flutter, and blockchain. Demonstrated expertise in leading and executing complex proof-of-concept projects, consistently delivering tailored solutions that significantly enhance operational efficiency and drive business growth. Known for a strong ability to bridge technical and business needs, ensuring that technology solutions align with strategic goals.

In addition to hands-on development, I am currently deepening my technical knowledge through a Master's Degree in Informatics, focusing on emerging technologies such as AI, machine learning, and advanced cybersecurity protocols. This ongoing education is enhancing my ability to innovate and stay ahead in the rapidly evolving tech landscape, while further solidifying my foundation in software architecture, data analytics, and digital transformation strategies.

My career is marked by a commitment to continuous learning and a passion for applying technology to solve real-world problems. As I advance in my studies and professional endeavors, I aim to contribute even more effectively to projects that push the boundaries of what's possible in the digital world.

PROFESSIONAL EXPERIENCE

Kanz IT - Junior Software Developer (Part-time)

Mumbai, India | Jan 2023 – Aug 2023

- Developed mobile applications using Flutter to deliver custom solutions, enhancing customer experience across Android and iOS platforms.
- Led a team in designing and implementing user-friendly interfaces, collaborating with UI/UX designers to improve user engagement.
- Integrated third-party APIs, expanding app functionality and offering users more features.
- Conducted code reviews and enforced best practices to maintain a high-quality, scalable codebase.

D3Code - Junior Full Stack Developer

Mumbai, India | Jan 2020 – Sept 2020

- Developed and deployed 10+ SEO-optimized websites, improving search engine rankings and user accessibility.
- Led a legacy system migration to modern platforms, reducing maintenance costs by 15%.
- Automated deployment processes through CI/CD pipelines, cutting release times by 30%.
- Provided technical support and training for end-users, ensuring smooth adoption and improved user satisfaction.

Projects

1.Auction.ify | Aug 2022 – May 2023

Academic Project

- Led the development of a decentralized auction system using Blockchain and Web3 security, ensuring transparency and reliability.
- Designed and implemented a secure payment portal integrated with Blockchain, allowing seamless transactions without chain blocks.
- Enabled smooth user participation through new account creation and integrated a third-party delivery agent for post-auction item delivery.
- Developed smart contracts to automate auction processes, reducing manual intervention and increasing efficiency.
- Enhanced system scalability to handle growing user numbers and transactions without performance loss.
- Integrated advanced encryption to protect user data and maintain transaction privacy.
- Coordinated with legal and compliance teams to meet Blockchain regulatory standards.
- Provided post-launch support, addressing user feedback and optimizing system performance.
- Conducted workshops to educate team members on Blockchain and Web3 security best practices.

2.Don't Trash It | Aug 2021 – May 2022

Academic Project

- Designed and developed a user-centric website to help individuals recycle plastics at home effectively, promoting sustainable practices.
- Implemented house-level solutions and resources, fostering environmentally friendly behaviors.

- Integrated a custom-built chatbot with a comprehensive dataset, offering personalized assistance on plastic recycling methods.
- Utilized web development and AI techniques to enhance user engagement and raise environmental awareness.
- Collaborated with environmental experts to ensure the accuracy and relevance of the recycling information provided.
- Developed interactive features for tracking recycling efforts and providing feedback on environmental impact.
- Ensured the website was mobile-responsive, making resources accessible from any device.
- Created educational content and tutorials on plastic recycling techniques and best practices.
- Analyzed user data to improve the chatbot's responses and overall user experience.
- Promoted the website through social media campaigns, boosting user traffic and community engagement.

3.Printable Report Card | July 2020 – May 2021

Academic Project

- Developed and implemented a user-friendly web-based system for students to access, print, and save report cards directly from the college's website.
- Utilized high-level programming languages and web technologies for seamless integration and ease of use.
- Collaborated with the college's IT department to integrate the system with student databases, ensuring real-time data accuracy.
- Implemented secure login features to protect student data and maintain confidentiality.
- Designed an intuitive and accessible interface, minimizing the learning curve for students.
- Added features like grade history tracking and customizable report formats to enhance functionality.
- Ensured cross-browser compatibility, allowing access from any device or web browser.
- Conducted user testing sessions to gather feedback and refine the system based on input from students and faculty.
- Provided training and documentation for college staff to ensure smooth adoption and troubleshooting.
- Monitored the system post-launch, addressing technical issues and releasing updates to improve performance and security.

EDUCATION

Masters in Informatics in Information Technology

Northeastern University, Toronto, Canada | 2023-2025 (Expected)

Bachelors in Engineering in Computer Science

St. Francis Institute Of Engineering, Maharashtra, India | GPA: 8.01 | 2019-2023

TECHNICAL SKILLS

- Programming Languages: Python, JavaScript, Solidity
- Web Development: HTML, CSS, React.js, WordPress
- Blockchain: Smart Contracts, Web3, Solidity
- Database Management: MySQL, MongoDB
- Cloud Platforms: AWS, Azure
