EDUCATION

Master's in Informatics Northeastern University

09/2023 - 04/2025

Toronto, Canada

Courses

- Advanced Cloud Computing
- AWS Infrastructure
- Network Protection and Cloud Security
- IT Strategy and Governance
- ADBMS
- Cloud Analytics
- Security Analytics

WORK EXPERIENCE

Software Developer Kanz IT

01/2023 - 08/2023

Achievements/Tasks

- Developed mobile applications and implemented backend cloud services using AWS.
- Integrated third-party APIs and improved mobile app scalability and cloud performance.
- Collaborated on serverless solutions using Lambda functions for app automation and backend services.
- Conducted code reviews and adopted DevOps best practices in a CI/CD environment.

Full-Stack Developer D3CODE

01/2020 - 09/2020

Achievements/Tasks

- Built and deployed SEO-optimized websites with cloud hosting (AWS EC2, S3).
- Automated deployment pipelines using CodeBuild and CodePipeline, reducing deployment errors by 30%.
- Migrated legacy web hosting infrastructure to AWS, optimizing costs and improving reliability
- Provided infrastructure and technical support for cloud-based web applications.

SKILLS

AWS (EC2, RDS, Lambda, CloudFormation, S3, CloudWatch, CodePipeline, CodeCommit, EKS)

CI/CD

Automation using Python

YAML

Shell Scripting

MySQL

MongoDB

CloudSQL

Python

Javascript

VPC

Subnets

VPN, NAT, Route53, Firewall, GuardDuty, IAM

PERSONAL PROJECTS

High Park Nature Centre (01/2024 - 05/2024)

- Developed an interactive web platform for High Park Nature Centre featuring a dynamic map displaying bird sighting locations throughout the park. Integrated geolocation data and user-friendly interface to enhance public engagement and environmental awareness.

Empathetic AI (01/2025 - 04/2025)

- Led a team in designing and developing an AI chatbot that offers emotionally intelligent career guidance.
- Integrated the DeepSeek 1.5B parameter model to enable nuanced, context-aware conversations.
- Deployed a custom model on Hugging Face for scalable and accessible delivery.
- Focused on empathetic interaction design to improve user trust and engagement.

Don't Trash It (Cloud-enabled Web Project) (08/2021 - 05/2022)

- Developed a sustainable recycling education website hosted on AWS CloudFront and S3.
- Integrated AI-based chatbots using AWS Lex and Lambda functions for user interaction.

Auction.ify (Blockchain, Cloud Infrastructure) (08/2022 - 05/2023)

- Led decentralized auction platform development with integration to AWS services.
- Designed secure VPC, EC2 instances, and S3 buckets with encryption and versioning.
- Implemented Lambda functions to automate user registration processes and smart contract deployments.
